SUMMARY

I am an enthusiastic beginner developer with a creative background. As a former fashion designer and artist, I bring a unique blend of creativity and analytical thinking to the world of programming. My journey started just a short while ago, and I've already gained hands-on experience in Python programming, HTML/CSS, FastAPI, and SQL. Passionate about continuous learning and growth, I am eager to contribute my creative flair and determination to build innovative software solutions.

PROJECTS

- test-program-simple-todo-app(Python, FastAPI) - GitHub
- Skilled-e-learning-landing-page(HTML/CSS[Responsive Design]) - GitHub - Demo
- Order-summary-component(HTML/CSS[Responsive Design]) - GitHub - Demo
- CS50-Introduction-to-Programming-with-Python(Python) - GitHub
- SQL-Khan-Academy-challenges(SQL) - GitHub
- All my repositories - GitHub
